IMPORTED/PROCESSED FIN FISH RUBY RED AHI

(Thunnus albacares)

BUYER'S INFORMATION

Peter Pan Ruby Red Ahi is the normal, Pacific Yellowfin Tuna, further processed to "fix" the vivid red color that characterizes tuna at its freshest.

The process introduces CO gas to the product under refrigerated conditions. Due to the temperature and conditions under which the smoking is done, this process takes several hours of exposure to complete. The process preserves the natural color of the tuna throughout the freezing and cooking process, giving the finished product a medium-rare, steak-like appearance similar to a filet mignon. This process has made ruby red ahi a favorite of discerning chefs everywhere.
